

Simplify Your Design Process

Diba's new offerings of in-stock standard tubing assemblies are ideal for OEMs and engineers interested in high quality, quick-turnaround components to accelerate the design phase of projects. The standard tubing assemblies feature Diba's proprietary flared ends to minimize dead volume and Click-N-Seal® fittings for secure, torque-adjusted connections every time. By using Diba standard tubing assemblies, you can:

- Accelerate bread boarding or prototyping
- Eliminate the lead time normally required for custom assemblies
- Bypass cumbersome component assembly
- Reduce the cost of custom parts in small quantities
- Eliminate the risk of over- or under-torquing the fitting
- Ensure quality connections throughout the design phase
